
FOLIO

Up, Up, and Away

It seems that each year during the doldrums of February leading up to St. Patrick's Day, the historical Pembina propeller wanders astray from its resting place in the coffee room of Pembina Hall. Mysteriously, the missing relic is invariably discovered, upon inquiries by Campus Security, somewhere in the confines of St. Joseph's College. With a hint of pride, the goodly people of St. Joseph's return the wood and brass monument to the concerned people of Pembina Hall. This small token of rivalry dates back to 1976 (the 50th anniversary of Pembina) when the propeller became a symbol of friendly competition between the two residences. Prior to this latest gesture, a certain spirit of mischief dates back as far as 1950 when raids on the women's residence were the challenge.

The propeller was given to Pembina Hall in 1945 by Group Captain J. Hutchinson on behalf of the departing RCAF. Number Four Training School of the RCAF was housed in Pembina from 1941 to the end of the war in 1945. At any given time during the war years, about 300 men occupied the residence.

The exact origin of the propeller is not certain. It is said to be from the first airplane to fly over the "hump to China." Some people have suggested that it was from a World War II vintage trainer. However, a quick glance through an illustrated history book on war aircraft leaves one with the feeling that it may date back

to much earlier times. The wood and brass construction of the propeller, as well as its relatively small size, does not fit with the 1939-45 war.

Although the brass plates inset in the propeller's blades may have no bearing on its origin, the use of these plates dates back to the First World War. At that time the brass plates were mounted on the

rear face of propeller blades to deflect bullets from unsynchronized machine guns being fired through the path of the turning propeller. Unfortunate for our theory, brass plates were widely used for purposes other than this.

The staff of *Folio* invites letters from anyone knowledgeable about the history of the Pembina Propeller. □

Beware of What You Drink

In response to the article "Water Unfit For Machines" in the 21 February issue of *Folio*, it has been brought to our attention that distilled water is not necessarily safe for human consumption. In fact, there are said to be documented cases of people becoming seriously ill as a direct result of drink distilled water.

In the 21 February article it was stated that distilled water is considered to be totally pure. While this statement remains true, it must be qualified. Assuming that the still in question is operating properly, water processed by that unit will be pure at the time of distillation. Unfortunately, the water is invariably stored in some sort of tank or container before use, and the temperature of storage is usually quite warm. Unless the most strict handling of the water and container is employed, bacteria can find their way into the container and multiply in a near perfect environment. Because all chemicals (e.g. chlorine to kill bacteria) have been removed during distillation, any germs in the water are free to multiply on a massive scale. Bacteria are induced into the water container through unsealed lids or other openings.

If this possibility is not bad enough, not all distilled water is totally pure. Many distillation units allow water droplets as well as vapor to pass into the storage tank due to faulty construction or the lack of maintenance. □

A Safer Campus: Update

Approximately two years ago *Folio* published an article titled "A Safer Campus." At that time the University was implementing measures that could, among other things, help reduce the trepidation one might feel when faced with a lengthy walk through a still and, in some areas, dully lit campus. The measures were recommended by the Safe Campus Committee of General Faculties Council and included the studied placement of many more light standards and a number of outdoor telephone booths; the printing and distribution of a list of emergency telephone numbers; and the visible development of Night Watch patrols.

Shortly after presenting its final report to GFC, the committee was disbanded and the monitoring of safe campus conditions became the responsibility of the Security Advisory Committee. The personal safety measures drawn up by the original committee are still very much with us and, due to a January meeting of adminis-

trators whose duties include campus security, have been reviewed and reconsidered in light of a perceived increase in the level of concern about sexual assault, actual and threatened. Where once there were four outside telephone booths in high traffic locales, there are now ten and Physical Plant can install more if need be. The phones, which are subsidized by the University, can be found at the following locations: Stadium Carpark, in the bus shelter in front of the Civil-Electrical Engineering Building, near the entrance to the Biological Sciences Centre, north of the Tory Building Lecture Theatres on Saskatchewan Drive, on 87 Avenue near the service road to Lister Hall, on the sidewalk between Pembina and Athabasca Halls, on the south side of the Education Centre, on the corner of 112 Street and 89 Avenue, near the north entrance of Corbett Hall, and at the southwest corner of Corbett Hall near the traffic circle. Other phone booths may be installed between the Law Centre and the Fine Arts Centre and on the west side of the Medical Sciences Building. There are also phones in the various parking kiosks, however the kiosks close at 10 p.m. week nights and are closed on weekends. The telephone booths are pinpointed on a map which appears in both the campus telephone and student directories. There are, however, two corrections. A phone has not been installed west of Medical Sciences and there is a phone at the southwest corner of Corbett Hall.

With regard to lighting, Physical Plant has installed some 250 new fixtures in areas such as the Quad, north of the Education Centre, north of the Agriculture Building and along a portion of Saskatchewan Drive, and around the student residences and the University Health Service.

Physical Plant also upgrades existing lighting on a continuing basis.

The first Night Watch patrols

were set up on an experimental basis and had a brief existence due to limited finances. The concept has since been revised by Campus Security which now employs six students (three males, three females) to walk the campus during the "silent hours." Two groups of two (a student and a regular member of the Campus Security) are dispatched each evening to patrol the campus in a discreet, watchful manner. Operating in radio contact with Campus Security headquarters, they check inside and outside buildings and provide an escort service should anyone be worried about going to a carpark or bus stop in the evening. The whole idea is to be low key, Mr. Perry says. His office, which has thirty-one people on staff full-time, stresses crime prevention. Crime, he says, needs an objective, an opportunity, and an offender. "Take away the centre 'o' (opportunity) and there is no crime."

Ten thousand copies of the Safe Campus Help List, a billfold-sized list of emergency phone numbers, especially for victims of sexual assault, have been printed and can be obtained from Student Help and the Students' Union Information Desk. Incidentally, the same number of cards was printed two years ago and all of them found their way into purses and wallets and onto handy bulletin boards.

The Edmonton Rape Crisis Centre provides twenty-four service and Lister Hall nurses-in-residence, who are trained to deal with sexual assault crisis calls, can be reached between the hours of 6 p.m. and 6 a.m.

Student Counselling Service has more women on staff than in the past and, of course, women are associated with each Night Watch patrol and a number of women are employed in the Campus Security Office. Thus, if a woman is a victim or near-victim of a sexual assault she could, if she wished, be assisted by a woman when she calls for help.

A statement by the Safe Campus Committee should be mentioned here. That is that "while no one can ensure that the University campus is now completely safe, or that no assaults will occur henceforth, Committee members are gratified that some of the problem areas identified in the (earlier) Academic Women's Association report do appear to have been taken seriously by those who could implement change."

To return to the first part of that statement, the following points, incorporated in the 1978 article, bear repeating:

■ If possible, when going anywhere at night, go with someone else, whether to a class, to study, or to work late.

Safe Campus Help List

The yellow cards which appeared two years ago are outdated. They have been replaced by red on gray cards which should be carried on one's person.

On Campus

Campus Security (emergency escort service) 24 hours	432-5252
Student Counselling 1 Sept. to 30 April Weekdays 8:30 a.m. to 4:30 p.m.	432-5205
1 May to 30 Aug. weekdays 8:00 a.m. to 4:00 p.m.	432-5205
Student Help 1 Sept. to 30 April weekdays 8:00 a.m. to 11:00 p.m.	432-4266
weekends 5:00 p.m. to 11:00 p.m.	432-4266
University of Alberta Hospital 24 hours	432-8822
University Health Service Emergency weekdays 8:00 a.m. to 5:00 p.m.	432-2612
Nurse-in-residence in session 6:00 p.m. to 6:00 a.m.	439-8076

Off Campus

Distress Line 24 hours	426-4252
Emergency Services (fire, police, ambulance, poison control, doctor) 24 hours	911
Rape Crisis Centre 24 hours	429-0023

The Office of Community Relations produces Folio on a weekly basis for the staff and other interested persons

Copyright 1980

- If you are alone, walk in open, well-lighted, well-populated areas.
- In the Library or other study areas, try to work where other people are nearby.
- Avoid putting yourself in a vulnerable situation, avoid being alone—or worse, being alone with strangers or casual acquaintances.
- Avoid giving information such as your address and telephone number to strangers or casual acquaintances.
- Do some role playing in your head and develop some firm ideas as to what you would say and do if accosted.
- Try to control your fear, which paralyses you and probably encourages the attacker.
- Think of a positive approach and put yourself into a winning position mentally.
- Do not carry a weapon like a knife that could be used against you and give the attacker a weapon when originally he had none.
- Try to take a self-defense course, particularly one that teaches hold-breaking techniques.
- If you are assaulted, obtain medical assistance as soon as

possible. This can be done at the University Hospital Emergency Department, most emergency departments in Edmonton hospitals, the University Health Service (only open during business hours on weekdays however), and the Rape Crisis Centre downtown.

- Receive counselling and advice from a supportive person who is not related to you.
- Report a sexual assault even if you have no intention of bringing charges. One can report anonymously to the City Police or Campus Security or through the Rape Crisis Centre, Student Help, or Distress Line. The report is important since it is the only way the police can be aware of the incidence of sexual assault, and the only way to discourage or apprehend individuals who make it a practice to molest or attack others.
- The Edmonton City Police Force, through its "Lady Beware" program and Crime Prevention Unit and Campus Security are able to advise individuals and groups about their personal safety. Campus Security can be contacted at 432-5252. □

Computing Society Open House

Saturday, 29 March will be the day of the computer on campus. The University of Alberta Computing Society in cooperation with Computing Science and Computing Services will hold an open house from 10 a.m. to 5 p.m. in the General Services Building. Everyone is welcome to attend the event which, to resurrect a phrase from the early '70s, will be a mixed bag.

There will be hourly tours of the hardware including the all-powerful Amdahl 470V/7, seminars on computing language, displays, graphics demonstrations on the plotting of programs, computerized chess, and a lunar lander program in which the man on the moon milestone is depicted in minute detail.

Visitors can also see two terminals of the new PLATO system, one which has the capability to instruct students in a variety of courses.

A number of professors and computing science graduate students will be present to offer advice and comments on the various computers and their place in the University.

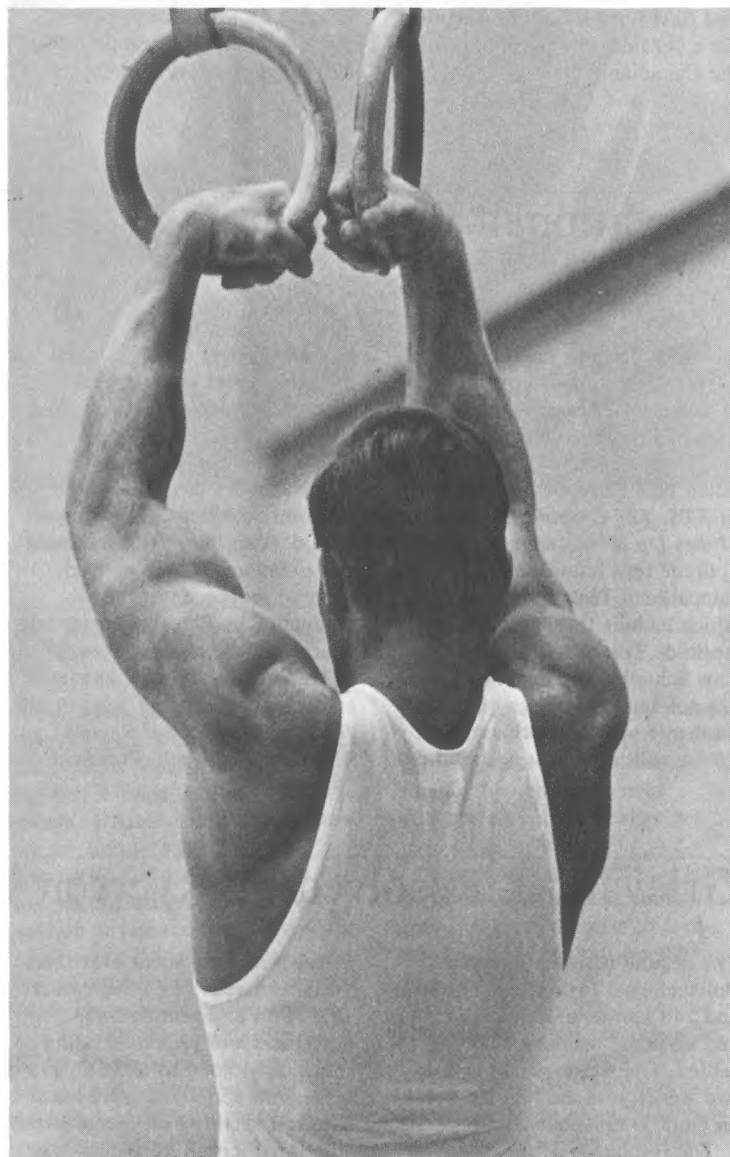

The Computing Society has one hundred and twenty members, the majority of whom are in their second year of computing science. The Society has an office in the Students' Union Building and the telephone number is 433-1541. Steve Dolha is the president and Fred Popowich is the vice-president. □

Shape Up for Spring

"Shape Up for Spring" is the title given to two courses organized for the public and members of the University community by the Faculty of Extension. Self-explanatory, the course titles, "Fitness for Men" and "Fitness for Women," clearly indicate the content of the courses which will run for twenty sessions, on Mondays and Wednesdays, beginning on 24 March. The instructors will be, for the men, Art Burgess, and, for women, Dianne Steiner. Each session will

last one and one half hours.

Registration for both courses is limited (40 men and 30 women) and will be accepted on a "first come, first served" basis. The fee is \$50. Registrations may not be accepted over the telephone. For more information about these fitness courses, please write to the Faculty of Extension General Office, 228 Corbett Hall, The University of Alberta, Edmonton, Alberta T6G 2G4. In-person registration maybe effected at this address. □

Conference on The Central and East European Community in Canada

From 13 to 15 March at Lister Hall, the Division of East European Studies, in cooperation with the Central and East European Studies Association of Canada and the Central and East European Studies Society of Alberta, is sponsoring a national conference on: "The Central and East European Community in Canada—Roots, Aspirations, Progress and Realities." The conference, both community and academic oriented, hopes to attract those interested in Central and East Europeans who account for a considerable percentage of the Canadian population. On

Friday, 14 March, and Saturday, 15 March, papers will be presented on the preservation and promotion of language and culture; various topics relating to the homelands of people from Central and Eastern Europe, including the Soviet Union; and Central and East European settlement in Canada.

Additionally, on Friday, 14 March, there will be a panel on second language retention followed by a workshop on heritage languages. Saturday, 15 March, in addition to scholarly papers, there will be two community orientated sessions: "Dialogue—

Central and East European Community/Government," and a panel on the "Mass Media and the Central and East European Community."

The opening session, the evening of 13 March, will feature songs by The University of Alberta Concert Choir, a solo vocal performance by T. Mallandaine and a reading by M. Kohut. These performances will be followed by a wine and cheese party and additional musical entertainment.

Registration for the conference is \$25, \$10 for senior citizens, and \$5 for students. Special fees

will be possible for those who can only attend one or two sessions. Registration includes admission to the wine and cheese party, the cultural evening and all refreshments served during the conference at Lister Hall. On Friday, 14 March, a banquet will be held at The Faculty Club. A limited number of tickets at \$12.50 per person, including wine, are available.

All interested parties are cordially invited to attend. For further information on the conference contact the Division of East European Studies, 300 Athabasca Hall, 432-3230. □

Educational Testing Service Criticized

Ralph Nader, the well-known advocate for consumer welfare, has recently released a report prepared by an undergraduate student at Columbia University. Allan Nairn's report, *The Reign of ETS: The Corporation That Makes Up Minds*, suggests that the aptitude tests administered by the Educational Testing Service, which include the Scholastic Aptitude Test (SAT) and the Law School Aptitude Test (LSAT), are not valid predictors of academic or career achievement. Worse still, such tests are reported

to favor "upper class" students. In fact, the report considers such tests of aptitude as a barrier to achievement.

The conclusions drawn by Mr. Nairn are based on a study of material collected over a six-year period. Also, they are considered to be similar to those arrived at in an independent study conducted by Douglas Porter and Warner Slack, medical faculty at Harvard University. The latter study is due to appear soon in the *Harvard Educational Review*.

William Turnbull, President of

ETS, in a response to the Nairn report, has observed that much of the material used in the study critical of his organization was published by the ETS itself. Furthermore, many of the criticisms leveled at the ETS have already been dealt with by that organization.

The Reign of ETS: The Corporation That Makes Up Minds is available from the Learning Research Project, PO Box 19312, Washington, DC 20036, USA. It costs \$30. □*

University Research in Jeopardy?

The Science Council of Canada has recently released a report of its Standing Committee on Research, which is chaired by Louis Siminovitch. The report, *University Research in Jeopardy: The Threat of Declining Enrolment*, has analysed demographic trends and has come up with the conclusion that university enrolment will decline by some twenty percent between 1982 and 1994. Such a decline, the report contends, will lead to a stagnation in the hiring of new faculty.

The Science Council has, therefore, made the following recommendations: 1) that universities attempt to achieve faculty pension mobility; 2) that productive researchers be encouraged to continue research after retirement; 3) that faculty and facilities be transferred between universities when research or teaching falls below the "critical mass" for useful work in a particular specialty; and

Grievances Resolved at Ryerson

The dispute between Ryerson Polytechnical Institute in Toronto and 240 non-tenured part-time and sessional teachers has been settled. The strike, which lasted two weeks, was the first against an Ontario university.

The resolution of the problem

calls for an agreement over three years retroactive to 1 September 1979. Still to be ratified, the agreement will provide a salary range of \$15,600 to \$22,180 over a ten-month period, an increase of fifteen percent which includes an additional month of employment.

Currently, non-tenured faculty salaries at Ryerson do not exceed \$17,800 for a nine-month contract. Another major issue, that of job security, was resolved by an agreement to offer new contracts on the basis of seniority. □*

4) that universities located near to each other develop joint programs at the graduate level.

The report of the Standing Committee on Research also recommends that provinces increase support of university-based research. It suggests that such support can be enhanced in two ways: 1) the establishment of research chairs in fields of particular interest to the provinces; and 2) the provision for the hiring of new faculty members up to the mid-1990s to inhibit the necessity of importing large numbers of staff after that time.

In addition to making these recommendations, the Science Council committee also addressed the problem of effective liaison between universities and industry. Recommended in the report are an increased effectiveness in the use of basic research through the

encouragement of "industrial spin-off"; the establishment of a program of research associate-ships funded by the NSERC; a ten-fold expansion of the NSERC Senior Industrial Fellowship Program; encouragement of faculty secondment to industry; and also the doubling of the current NSERC Industrial Post-doctoral Fellowship Program.

Report Number 31 by the Standing Committee on Research of the Science Council of Canada, *University Research in Jeopardy: The Threat of Declining Enrolment*, is available from the Science Council of Canada, 100 Metcalfe Street, Ottawa, Ontario K1P 5M1. It costs \$2.95. □*

*These three articles were based on information contained in "Notes from the AUCC," Number 74, 22 February 1980.

International Students: Senate's Response to CTV

In the 7 February issue of *Folio*, the CTV "Reply—Foreign Students in Canada" was published. This "Reply" has been circulated to people who have criticized the CTV television program "Campus Giveaway" in the series "W5," broadcast on 30 September 1979. In the "Reply" many references were made to the Senate's *Task Force Report on Visiting International Students*. Our Senate, however, was disturbed by the CTV use of the Report it had prepared and has since directed Chancellor Forest to transmit that concern to the producer of "W5." What follows is the text of Chancellor Forest's letter to the "W5" producer, written on 14 February.

Dear Sir,
We have been made aware of the letter you are forwarding to those people who have written to you complaining about certain aspects of your program "Campus Give-

away." The letter is titled "W5 Reply—Foreign Students in Canada."

We are concerned that although you quote accurately from our Task Force Report on Visiting International Students in Alberta, the positive attitude towards international students inherent in the Report is not conveyed in your reply. By quoting portions of the Report out of context, an incorrect conclusion regarding the Senate's position could be drawn.

The Executive Committee of Senate discussed this at its meeting on 11 February 1980, and I was asked to request from you a list of the persons to whom you have sent this letter, so that we might send each one a copy of our complete Report.

Your assistance would be very much appreciated.

Yours sincerely,
Jean B. Forest (Mrs.),
Chancellor.

"Revenge Of The Pink Panther" by United Artists.

Pigeon Post

■ You humans may as well give up your nefarious plans to dislodge us pigeons from our rightful domain on the battlements of Athabasca Hall, because we are on to your schemes. Copies of *Folio* discarded by absent-minded professors are carried to our rooftop by the wind every Friday afternoon, and we read them carefully for news of any human endeavors that do not dovetail with our interests. So we know what is going on, and we are not going to be taken in by hocus-poci like greased parapets, spiked windowsills,

spiked birdseed, or phony piano lessons. We intend to occupy the roof of Athabasca Hall as long as the north wind blows over Alberta, so you had better get used to us.

This is serious business. I speak for a lot of irate birds, and you humans would be wise to take heed and not just put me down as a bad actor.

Walter Pigeon
Spokesbird, Fifth Athabasca

Folio regrets that it cannot devote any more space after 27 March 1980 to the "pigeon problem."

Climate Workshops On Campus

As part of the Canadian Climate Program, a series of workshops was held last week, on 28 and 29 February, in the Henry Marshall Tory Building. Organized by the Alberta Climatological Association in conjunction with the Environmental Management Service of the Canadian Climate Centre, which operates under the aegis of Environment Canada, the workshops had as their general theme the topic "Climate and Water Resources."

There were a number of speakers invited to address the workshops. Within the scope of the general theme, their presentations were quite diverse. The impact of climate and water on wildlife and inland fisheries was explored. Also, particularly appropriate at this time when provincial authorities have suggested the all but incredible

idea of transferring water resources from the northern reaches of our province to more arid areas in southern Alberta, a major concern addressed was the impact of climate on the planning, design, operation and management of water resource projects.

Following the presentations, attendees at the two-day workshop split into small groups in which they discussed in detail a wide variety of concerns. The impact of climate on migratory birds, its relationship to the design of dams and reservoirs, forest and watershed management are only a few examples of the topics considered by the smaller working groups.

Organizers for the workshops were Ron Whistance-Smith of the University Map Collection and Keith Leggatt of Alberta Energy and Natural Resources. □

An Invitation for More "Experts"

Now that *Need An Expert* has been circulated to all University departments perhaps it is time to explain how the Office of Community Relations arrived at those names which appear in the contact book. As well, we would like to extend another invitation to all faculty members not appearing in the contact book, to have the opportunity to do so.

Work on the media contact book began during the summer of 1979. In order to reach as many academics as possible we chose to pursue two approaches. First, on 23 August "An Invitation to all Faculty" notice appeared in *Folio*. It extended the invitation to all members of the academic community to participate. This notice ran for five weeks, 23 to 30 August, 6, 20, and 27 September. Also, all individuals already registered with the University's Speakers' Bureau were contacted, via letter, asking if they would consent to having their names appear in *Need An Expert*.

It must be appreciated that it is almost impossible to reach each academic individually, thus the reason for choosing these two methods of contact.

It was felt that, as such a directory would be updated perhaps on a semi-annual basis, it should be produced with the least amount of expense. We intend to continue publishing *Need An Expert* in this manner to allow us to keep the media abreast of faculty changes and additions.

In keeping with this thought, it is now planned that the publication will be updated within six months. Now that the directory has been circulated on campus, we find that many academics overlooked our "invitation," for whatever reason, and now wish inclusion.

If you would like to participate in our updated version please complete the accompanying form and return it to the Office of Community Relations. □

International Conference Coming to Alberta

"Computer Models: Forecasting Socio-Economic Impacts of Growth" is a conference to study the potential and limitations of computer models as forecasting tools. It will be held in Jasper from 20 to 23 April.

The western Canadian provinces and many of the western states in the United States are experiencing tremendous resource development and growth. Government departments and resource corporations alike are seeking appropriate tools to help them assess and forecast the social and economic impacts of many projected developments. Various computer models have been developed in Canada and the United States to assist decision makers evaluate these impacts. Although the use of computer models for this type of evaluation is gaining greater usage, there remains some question as to their capability and credibility. A concern for the adaptability and transferability of these models to differing socio-political region further emphasizes the need for assessment. The conference will bring together model developers and potential users to study some

of the computer models that have been put into use.

Presentations at the conference will be based on the following topics:

"Computer Models and Planned Development: Overview"

"State of the Art: Impact Assessment"

The concerns of planners and advisors about socio-economic models.

"Computerized Socio-Economic Impact Assessment Models: Potentials and Limitations" Demography-Human Ecology and Community Analysis

The Boom H model for Alberta use

SIMPACT—socio-economic and infrastructure planning systems REAP economic—demographic model

The Colorado Energy Resource Development Model

"The M.A.E. (Model of Alberta Economy)"

The Rural Industrial Growth Impact Model

The Municipal Fiscal Impact Model

The fee is \$100. Please telephone 432-3035 for more information. □

An Invitation to all Faculty

The Office of Community Relations is currently compiling a media contact list of faculty members. The purpose is to provide area media with names and telephone numbers of those people willing to act as media contacts. Kindly fill in the form and return it to the office of Community Relations. Your participation would be appreciated.

Name _____

Department _____

people

John E. Semple, Associate Professor in the Department of Physical Therapy, has been invited by the College of Medicine University of Lagos, to act as external examiner for the graduating students in physical therapy. When in Nigeria, Professor Semple was invited to give a

series of lectures.

Roger A Shiner, Professor of Philosophy, recently presented a paper to a meeting of the American Society for Aesthetics at the University of Arizona. He also participated in a symposium at a conference in Vancouver on "Reason in Ethics," sponsored by Simon Fraser University.

The Social Science Federation of Canada has awarded a grant in principle towards the publication of a manuscript by *C.C. Anderson* (Educational Psychology) and *L.D. Travis* (UBC) with the title *Psychology and the Liberal Consensus*.

Professor Raymond U. Lemieux, of the Department of Chemistry, has been invited to spend the week of 26 February to 2 March

1980 at the University of California, Los Angeles, as a Distinguished Visiting Professor.

Professor Walter E. Harris of the Department of Chemistry has been elected as a Fellow of the American Association for the Advancement of Science. The citation stated "For contributions to chemical education through several texts in analytical chemistry and for research in temperature-programmed gas chromatography."

Bruce Bain, Associate Professor, Educational Psychology, addressed The Alberta Cultural Heritage Council on the topic of "Language Planning in the Global Village."

Bill DeGagne, Operations and Energy Management, was recently installed as administrative vice-

president of the Downtowners Toastmasters Club.

Ukrainian dissident *Valentyn Moroz* was in Edmonton recently and his itinerary included The University of Alberta. On 28 February he met privately with President Horowitz and Dr. Manoly Lupul, Director of the Canadian Institute of Ukrainian Studies at the University. Later that day, he conducted a seminar at the Institute.

Mr. Moroz spent thirteen years in Soviet prisons and hard labor camps after being arrested on charges of anti-Soviet agitation and propaganda. He was released in April of 1979 as part of a USA-USSR prisoner exchange. The release took place only after a world-wide campaign had been conducted.

Norwegian homesteaders near Square Deal, Alberta, 1912. (Glenbow-Alberta Institute)—a photograph in the "Last Best West," presented by Alberta Culture at the Provincial Museum of Alberta to 31 March, and circulated by the National Museum of Man.

coming events

Listings must reach the Editor by 9 a.m. on the Thursday prior to publication. Written notification is necessary. Listings should be sent to 423 Athabasca Hall.

Films

National Film Theatre

7 and 9 March. 7 p.m. and 7:30 p.m. respectively. "Człowiek z Marmuru/Man of Marble" (Poland, 1976). 7 and 12 March. 9:30 p.m. and 7:30 p.m. respectively. "Panny z Wilka/The Young Ladies of Wilko" (France/Poland, 1979). 12 and 23 March. 9:30 p.m. and 7:30 p.m. respectively. "Zmory/Nightmares" (Poland, 1978). 13 March. 9 p.m. "Smierc Prezydenta/Death of the President" (Poland, 1977). For information on the above please telephone the Citadel Theatre, 9828 101A Avenue,

426-4811, extension 69. Admission is \$2.75 regular, \$2/students and senior citizens, and free for children (up to 12 years) when accompanied by an adult. Series tickets are available.

SUB Cinema

10 March. 7 and 9:30 p.m. "Midnight Express." (UK, 1978). 11 March. 7 and 9:30 p.m. "Movie Movie" (USA, 1978). 13 March. 7 p.m. "Swept Away" (Italy, 1974). 9:30 p.m. "Seven Beauties" (Italy, 1974).

service information

Information must reach the Editor by 9 a.m. on the Thursday prior to publication. Written notification is necessary. Notices should be sent to 423 Athabasca Hall

Notices

Faculty Women's Club

The Faculty Women's Club will hold a luncheon at The Faculty Club on 12 March, at 12:30 p.m. A representative of "Workshop West" will present what is expected to be a light-hearted look at the theatre. The luncheon fee is \$6. Tickets are available to club members from Betty Smith (432-0623) or Kathy Marsden (434-8859).

German Studies Summer Course Kiel University

The five-week summer course will examine important developments in the Federal Republic of Germany in such areas as politics, economics, education, jurisprudence, public administration, fine and dramatic arts. The course is designed for non-German speaking advanced students or young faculty members in all fields, who are interested in improving their understanding of recent developments in Germany. Preference will be given to applicants whose studies relate to Germany.

The Summer Course runs from 15 June (arrival) till 19 July 1980

(departure) and takes place at the Christian-Albrechts University of Kiel.

Application forms are available from the New York Office of the German Academic Exchange Services (DAAD), 535 Fifth Avenue, Suite 1107, New York, NY 10017. Please specify "SK Kiel." All application materials must be received by DAAD New York on or before 17 March 1980.

Campus Law Review Committee

A meeting of the Campus Law Review Committee will be held on Thursday, 13 March, at 2 p.m. in 3-17 University Hall. The topic of the meeting is to be "Disciplinary Procedures in Residences." Anyone wishing to make a written or personal submission should give notice of such intention to Mrs. L. Plaskitt, 2-1 University Hall, telephone 432-4715.

Scholarships, Fellowships and Awards

Contact the Student Awards Office (432-3221) for information on the following.

Hugh Kelly Fellowship

Rhodes University in Grahamstown, South Africa, invites applications for the 1981-82 Hugh Kelly Fellowship. The Fellowship is awarded in alternate years to enable senior scientists to devote themselves to advanced work in any one of a number of science departments at the Rhodes University.

The Fellowship includes the award of a stipend and return economy air fare. For more information, please write to the Registrar, Rhodes University, Grahamstown, 6140 RSA.

Research Grants

Granting Agencies: Application Deadlines

This list of deadline dates for submissions to granting agencies for research funds, exchange programs, and travel grants is published every month in *Folio*. To allow sufficient time for processing, all applications should reach the Research Grants and Contracts Office at least ten days before the deadline date. Where other University resources are involved, the time requirement may be much longer than ten days and such applications should therefore be submitted well in advance. An extra copy of the application should be provided for the Research Grants and Contracts Office.

Further information may be obtained by consulting the *Calendar of Granting Agencies for Research Funds, Exchange Programs, and Travel Grants*, which is available in the offices of Deans, Directors of Institutes and Centres, and the Department Chairmen, or by telephoning the Research Grants and Contracts Office, 432-2002. Note: Although the *Calendar* is updated on a continuous basis, the following information is subject to change without notice.

If staff members have advance information on forthcoming changes, the Research Grants and Contracts Office would appreciate being advised.
Code: (R) Research Funds; (E) Exchange programs; (T) Travel grants.

Granting Agency	Deadline Date
American Philosophical Society	6 Apr.

Positions Vacant On-Campus

Wage and Salary Coordinator

(Administrative Professional Officer)
This position will involve the incumbent in a wide range of challenging programs. Responsibilities include administering a job classification system, maintaining a competitive wage and salary structure, and the administration of a performance appraisal system for an employee bargaining unit of 3,200. There is also supervisory responsibility for a small support staff.

Qualified candidates will be university graduates preferably in Commerce or the Social Sciences with a minimum of three years directly related experience in compensation administration, preferably in a large organization. Applicants must be knowledgeable in the design and implementation of job evaluation systems, including job analysis. The salary range is \$19,698 to \$26,593 per annum with appointment salary commensurate with qualifications. An outstanding benefits program is offered.

Interested persons are invited to submit a comprehensive résumé to: Personnel Services and Staff Relations 3rd Floor, Students' Union Building 114 Street and 89 Avenue Edmonton, Alberta T6G 2J7
An equal opportunity employer.

inclusive.

The Senate

The University of Alberta

Nominations for Public Members

We invite nominations from the public for several vacancies on the University Senate. Volunteer members serve on Task Forces and Committees concerning the academic community. Senate meets formally four times a year.

It is the duty of the Senate to inquire into any matter that might enhance the usefulness of the University.

There are no formal qualification requirements but consideration will be given to community service of nominees from central and northern Alberta. Members serve for three-year terms beginning July 1.

Nomination forms are available from the Senate Office, and should be returned, completed, by April 7, 1980 to:

The Chairman, Nominating Committee
The Senate
The University of Alberta
150 Athabasca Hall
Edmonton, Alberta
T6G 2E8
